

COUNSELING SERVICES

The primary goal of the Counseling Center is to promote students' personal development and psychological well-being. Counseling services are provided for students with a variety of personal, social and life-planning concerns.

Our experienced professional counselors, psychologists, social workers and graduate students assist students in addressing issues which may interfere with their progress at the University.

The counseling process requires participation from both the student and counselor, however, it is ultimately the student who chooses to take steps toward healthy changes.

The Center offers counseling to currently enrolled Missouri State University students. Consultation and referral services are available to others. There are no fees or charges for counseling-related services.

GETTING STARTED

Getting started in counseling at MSU is easy! The first counseling session—called an Intake—consists of exploring the reasons why a student is seeking counseling, relevant personal history and the development of the student's goals for counseling. To schedule an intake, students may call the Counseling Center at 417-836-5116.
